EVOLUTION 3D[®] REPLACEMENT BUMPER

RHINO 4X4 EVOLUTION 3D® FRONT BUMPER

The Evolution 3D Bumper will evolve your 4x4 vehicle into an aggressive off-road machine without compromising its stylish lines and aesthetics. This front replacement bumper is now available with several exciting new features that will satisfy any off-roading adventurer.

It is manufactured from 3mm and 5mm all-steel material to protect your engine's vitals. It boasts full winch compatibility and two snatch-rated recovery points, as well as a class-leading approach angle.

This bumper comes standard with a heavy-duty bash plate that continues all the way to the cross-member. Other brands charge a premium for this extra feature.

The Plug and Play LED fog lights are fully compatible with the existing electrics. The Evolution 3D Bumper includes provision for front parking and radar sensors used for adaptive cruise control and auto braking. Fender flare extensions are included as standard for this bumper. Fender flare extensions are included as standard for this bumper.

COLOUR OPTIONS

The Evolution 3D Bumper is zinc coated for corrosion protection and finished in a hard-wearing powder coat. Standard colours are matt black or white with matt black mid-section. The middle section of the bumper is available in matt black only.

SAFETY

The Evolution 3D Bumper has passed many dynamic crash tests in Australia to ensure it adheres to the existing safety systems for example, air bags. Air bags must fire at the right time. The Evolution 3D Bumper is airbag compatible and certified.

AIRFLOW

Our bumpers have been tested to provide maximum airflow to all the necessary cooling parts of your engine.

INSTALLATION

The Evolution 3D Bumper is the first modular, 3 piece designed bumper replacement. This is what differentiates it from all other replacement bumpers. The standard bumper on your vehicle gets removed completely and can be kept or sold.

OPTIONAL EXTRAS

- Colour coding
- Shackle
- Winch
- Spotlight mounting bar
- Spotlights

RHINO 4X4 ROCK SLIDERS

RHINO 4X4 ROCK SLIDERS consist of a solid 3mm material, providing maximum protection while maintaining great clearance. Powder coated matt black and includes high lift jacking points.

RHINO 4X4 TOUGH SERIES WINCHES

RHINO 4X4 TOUGH SERIES WINCHES are available in 3 sizes. The entry level A series 12 000LBS with a 3 year warranty and then the premium series 12 500LBS and lastly the 9500LBS with a 5 year warranty.

HD & COMBAT SERIES LED LIGHTING

The **HD SERIES SUPER SLIM LIGHT BAR** is like no other. It offers a super slim profile which enables you to mount it in locations others just can't. This light bar can provide a powerful 7,400 lumens of light from its super slim profile.

The **100W COMBAT LED BAR** are in a class of their own, precision CNC machined and modular. Mix and match beam pattern, colours and number of LED's with ease. Each LED plugs into the next and allows for any length required.

TRAILMAX ROOF RACK SYSTEM

The **TRAILMAX ROOF RACK SYSTEM** is tough, aggressive and yet follows the vehicle's original lines and profile. The design is also much more streamlined than most allowing for less wind resistance, better economy and less wind noise. The TrailMax roof rack system is designed to be versatile allowing many accessories from other racks to be mounted directly on. We have also developed a range of Trailmax Rack accessories to complement our racks and will get you ready for any adventure. Load capacity is dynamic 100kg and static 300kg. Made from zinc coated and then powder coated mild steel and powder-coated aluminium side.
